

READY TO TAKE CONTROL OF YOUR CRUDE AND REFINED PRODUCT TRADING?

Streamline your operations with ENTRADE®.

ENTRADE®: THE COMPLETE SOLUTION FOR CRUDE AND REFINED PRODUCTS

ENTRADE® is designed to simplify and optimize crude oil and refined product trading. With one integrated platform, ENTRADE® unites trading, logistics, inventory, and risk management, helping you reduce complexity, control costs, and improve decision-making across your business.

Experience seamless operations and real-time insights to stay ahead in a competitive market.

CRUDE CARGO MANAGEMENT

ENTRADE® brings full visibility to your physical and financial positions, making it easy to manage logistics, track inventory valuations, and capture all associated costs. Purpose-built for oil markets, ENTRADE® keeps your front, middle, and back offices aligned for operational efficiency.

FREIGHT AND CARGO TRADING

ENTRADE® mitigates cargo transport risks, from shipping lane congestion to freight rate volatility. By consolidating freight risk within your company's overall position, ENTRADE® enables a secure, efficient transport strategy for crude and refined products.

REFINED PRODUCT MANAGEMENT

ENTRADE® supports trading, inventory tracking, and cost monitoring for refined products. Capture risk exposure across deal types, schedule transport, and automate cost tracking to streamline operations and protect profitability.

ENTRADE®: UNIFYING TRADING, LOGISTICS, AND RISK

ENTRADE® empowers companies in crude and refined product sectors to better manage every aspect of their operations—from extraction to blending, distribution, and storage. Gain full visibility into trading, marketing, scheduling, and credit management with a single, centralized system built to drive efficiency and profitability.

MIDDLE OFFICE

Schedule transportation via pipeline, vessel, barge, rail, and truck

Track logistics, inventory costs, and their P&L impact

Automate logistical movements for accurate scheduling

Manage volumetric balances and splash blending impacts

Track inventory positions and values across products and locations

FRONT OFFICE

Handle the capture, control, and confirmation of trades

Manage marketing agreements throughout the trade lifecycle

Optimize trading and hedging activities

Gain visibility into both physical and financial positions

Value positions with mark-to-market, VaR, and earnings at risk

BACK OFFICE

Automate ticket validation and actualization

Generate accurate pre-settlement and settlement statements

Calculate inventory value with weighted averages at key locations

Automate routing and approvals for contracts and trades

Automate payables and receivables settlement processes

Reduce errors through automated workflows
