

READY TO POWER YOUR RENEWABLES AND CARBON TRADING?

Optimize with ENTRADE®.

ENTRADE®: FOR RENEWABLES AND CARBON MARKETS

ENTRADE® offers a seamless, cloud-based platform to manage every aspect of renewables and carbon trading.

By unifying trading, inventory, operations, settlements, and risk, ENTRADE® provides the tools needed to simplify complex transactions and increase visibility across the lifecycle of environmental credits, renewable fuels, and carbon offsets—helping you make better, faster decisions and drive profitability.

RENEWABLE FUELS MANAGEMENT

ENTRADE® provides complete control over renewable energy trading, from inventory to accounting. Manage the full lifecycle of environmental credits—standalone or bundled—optimizing credit value and supporting sustainability goals with ease.

CARBON MARKET SOLUTIONS

ENTRADE® supports voluntary and compliance carbon markets, tracking carbon allowances and offset exposures. Customizable and flexible, ENTRADE® keeps you aligned with evolving carbon projects for transparent trading and reporting.

BIOFUELS OPERATIONS OPTIMIZATION

ENTRADE® simplifies biofuels management, tracking production, dispensing, and calculating credits like RINS and LCFS. Automated credit sharing and registry reconciliation reduce administrative work, keeping biofuel transactions accurate and efficient.

ENTRADE®: INTEGRATED ETRM FOR RENEWABLES AND CARBON

ENTRADE® offers a complete ETRM solution to support the complex needs of renewable and carbon markets, covering everything from deal capture to operational risk management. With ENTRADE®, companies gain a single platform to monitor positions, manage compliance, and make data-driven decisions—enhancing profitability and environmental impact.

RENEWABLES/ CARBON

Accurate capture and valuation of environmental instruments

Bundling renewables with physical transactions for easy tracking

Modeling complex pricing curves for offset markets

Supporting all commodities and diversified bundling

Integration with emerging systems for market diversification

Comprehensive support for all renewable energy sources

OPERATIONS/ SETTLEMENT

Efficient tracking of certificates, allowances, and offsets

Streamlined delivery management for purchases and sales

Automated reconciliation of environmental registries

Tracking delivery events for quick and accurate settlements

ETRM SUPPORT

Deal capture and risk reporting

Valuation and attribution for renewable and carbon assets

Scheduling physical movements and tracking costs

Monitoring inventory levels and settling transactions

Tracking credit exposure and generating accounting entries

Comprehensive reporting and data warehousing
